

The Myriad Scroll

- Individual yarn control giving Full and Multi repeat patterning
- Total design freedom
- Excellent operator access
- Easy maintenance and maximum reliability
- Production speeds in excess of 1000 stitches per minute

The Myriad Scroll

Leading the World in tufting machinery technology

Design Capability

The Myriad is a Full Repeat Scroll that allows the designer to create a full spectrum of patterns from precise high definition to subtle textures and shadows. This is achieved through fine individual yarn feed control throughout the stitch cycle

Application

The Myriad Scroll is an ideal patterning tool to be used in the production of Broadloom Carpet, Carpet Tiles, Bath Mats and Rugs. The Myriad Scroll can also be used in conjunction with other patterning devices. It is also available in Cut-Loop.

Operation

The Myriad Scroll has easy operator access for yarn threading down the face of the machine from each yarn control device. Each yarn is blown through an access tube and arrives directly to the yarn control device eliminating crossed yarns. The yarn control device is made up of a high precision motion control drive with a nip and drive roller assembly. The nip roller tension ensures no yarn slippage giving high definition to all patterning.

Maintenance

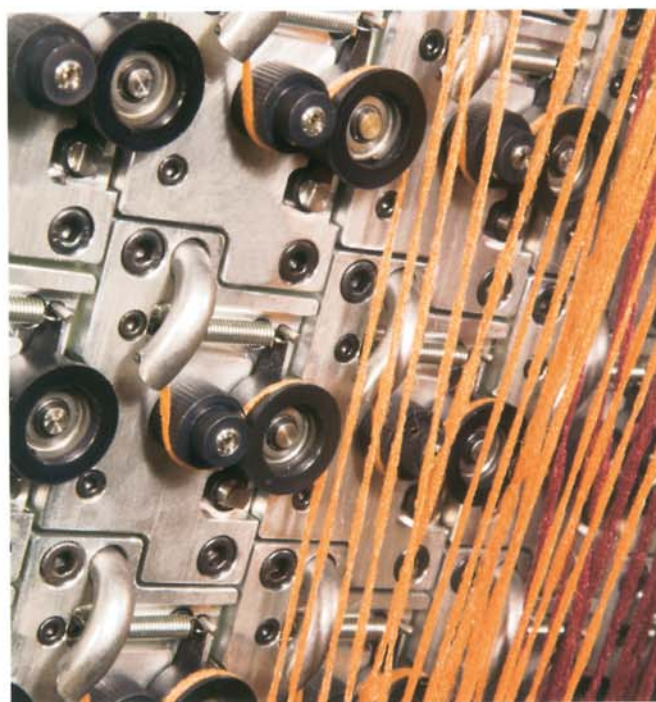

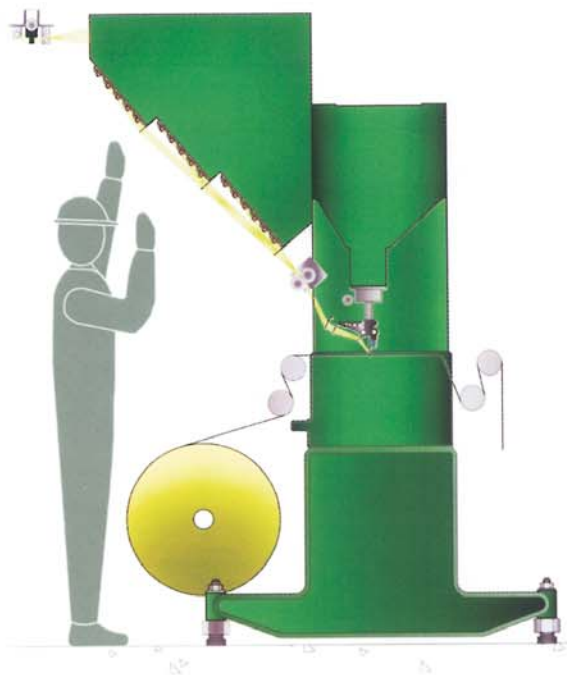

Ease of access makes cleaning and maintaining the Myriad Scroll simple and easy. The motion control drives are a marvel in simplicity with high torque properties.

Myriad Scroll 1&2

The Myriad Scroll is available in two distinct formats Myriad Scroll 1&2. Myriad Scroll 1 is a single yarn control Scroll giving you the full freedom of design capability producing either full repeat patterns or fixed repeat patterns allowing you to create a myriad of texture shadows and high definition colour patterns.

Myriad Scroll 2 is a dual yarn control Scroll that gives you all the benefits of the Myriad Scroll 1 with fixed repeats.

This configuration also gives you a considerable cost saving because you use only half the yarn feeds of a single yarn control Myriad Scroll.
