

Sampling Centre

- Demonstration facilities
- Diverse machine and attachment range
- Design studios
- Showroom and conference facility

Demonstration Facilities

To stay ahead in the world market, Cobble constantly strives to meet the challenges of the tufting world by listening to the demands of customers, continuously investing in the development of new technology. Consistent with this philosophy, Cobble has upgraded its Sampling Centre, which has involved major changes both in terms of machine sampling capability and also the area's aesthetic appeal.

Designed to effectively house a permanent display of the latest developments alongside existing tufting technology, the Sampling Centre provides superb machine demonstration facilities. In addition to the assistance of qualified operators, support staff from Sales and Applications are also readily to hand.

All our existing and potential customers are encouraged to take advantage of this unique and impressive facility; booking a sampling slot requires just one call through to Cobble Sampling Centre.

Design Studios.

Housed within the Sampling Centre, and equipped with the latest textile design technology, our three Studios provide visitors with a 'hands on' opportunity to work on the varied design systems. Studios are individually dedicated to Apso, Nedgraphics and Tecos systems.

The systems' features include the ability to realistically simulate carpet texture on screen and produce high quality printed proofs, eliminating the requirement to physically produce every design.

Recent design systems' developments mean that 'virtual' sampling with instantaneous results can be achieved.

Sampling Machines.

The Sampling Area hosts a diversity of machines and attachments which will fulfil any customer's sampling specification needs.

All the following are servo controlled:

- 3 Pile height Double Sided Full Repeat Scroll (FRS) with Dual Sliding Needle Bar (DSNB)
- Double sided plain yarn feed with DSNB
- 2 Pile Height FRS Level Cut Loop with single sliding needle bar
- 6 Roll Double Sided Multi Roll Attachment with DSNB and Jutemover
- Sculptor single end control Multi-Pile Height Machine
- Electra Servo Scroll Machine, 2 to 5 pile heights with DSNB and Jutemover
- Colortec 1/7" and 1/10" gauges

Electra Servo Scroll

Showroom and Conference Facility

Cobble has completely revamped its showroom to make it a more effective focal point where a series of presentations and DVDs can be run on the plasma screen. Additionally, a wide array of samples has been compiled

and arranged in to a backlit unit for customer viewing. The Showroom now offers the ideal environment for customer training and for technical discussions.
